STEP 4: Insert the sink in the working surface cut out.

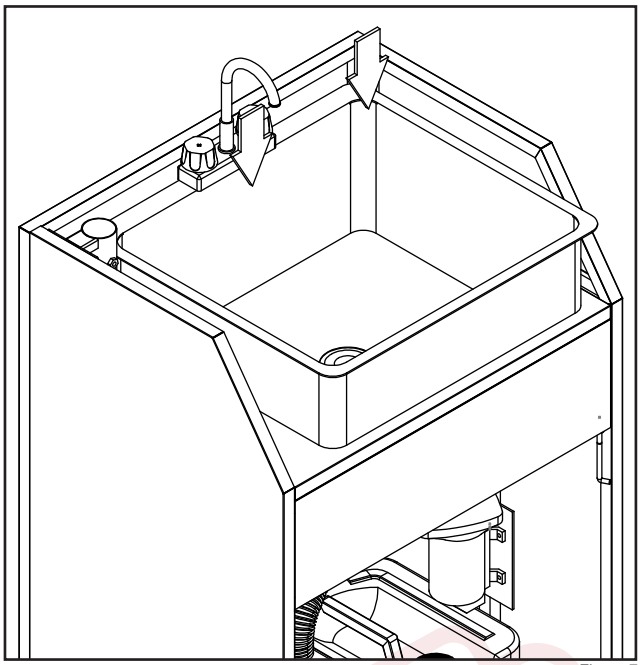

Figure 7

STEP 5: Insert flexible drainer in the 6gal waste water tank opening.

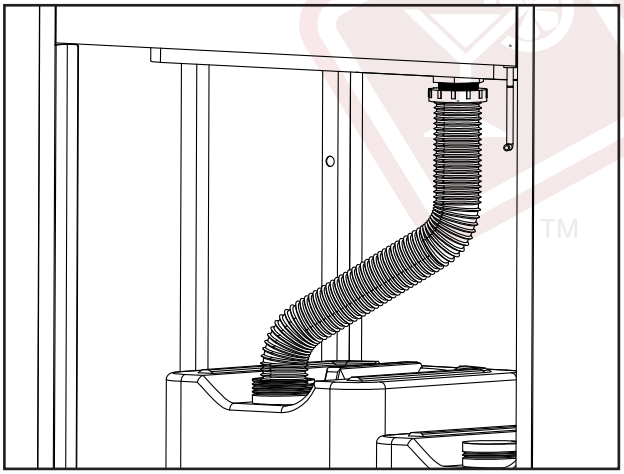

Figure 8

STEP 6: Install clear plastic hose in the pump's inlet port. Secure hose to the nipple fitting using a hose clamp. Take braided hose and connect it to the discharge port. Use as much teflon tape as needed.

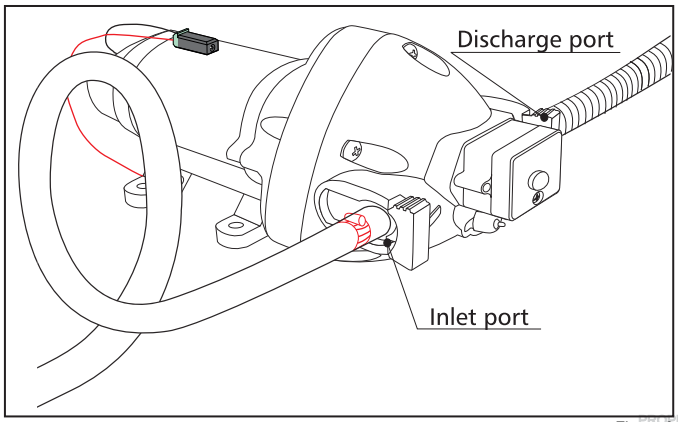

Figure 9

STEP 7: Insert clear plastic hose into the 5gal clean water tank.

Note: Fill clean water tank. Remember to always do so when all electric components are disconnected from a power source.

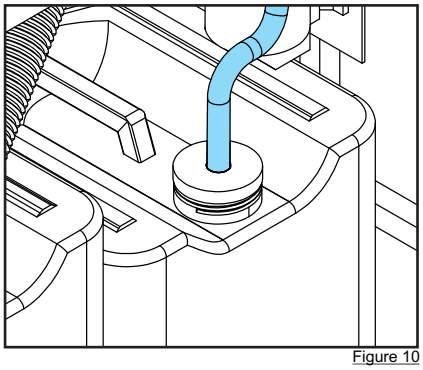

Figure 10

STEP 8: Plug the pump's power adapter cable to the plug placed on the pump.

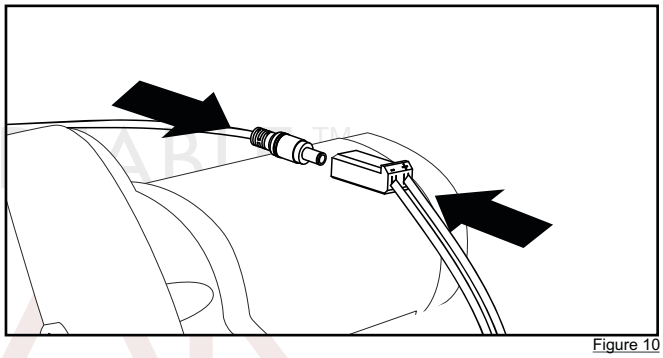

Figure 10

STEP 9: Place power adapter on pre-installed velcro tape on the side wall of the podium. Plug pump to power adapter.

Note: Use bottom grommet to plug power adapter to a wall outlet.

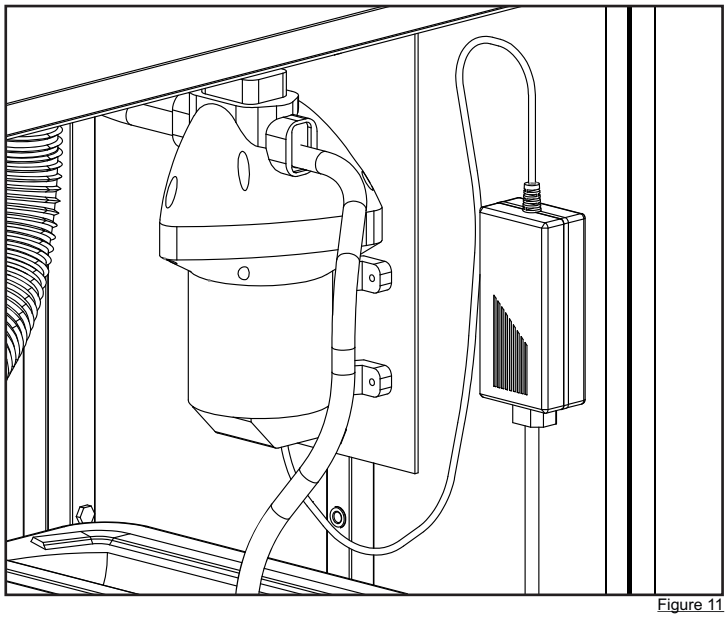

Figure 11

Do not plug the power supply to the wall or battery yet.
Pump is active when plugged in.
There's no on/o ffswitch.

OPERATION INSTRUCTIONS

Before turning the system on

- Make sure all the fittings, hoses and cables are properly plugged and/or sealed.
- Double read this guide if necessary.
- Read the maintenance and care guide as well as the pump manufacturer's guide.

Operating the system

To turn it on

1. Fill the clean water tank.
2. Open the faucet.
3. Connect the pump to a wall plug or battery.
3. The pump will start working, once you see water coming out of the faucet close the faucet.

To turn it off

1. Open the faucet.
2. Disconnect the pump's power adapter from wall plug.

Recommendations

- Always keep water inside the the clean water tank, this is critical for the system to work properly.
- The hoses could keep water inside of them after every use.
- The pump is capable of running dry for a couple minutes. Serious damage could occur if it runs dry for long periods of time.
- When disassembling the system there will always be water left in the hoses. Have a towel handy as you are taking apart.
